

HAS Fire Dampers

HAS Fire Dampers

Description

The HAS range of curtain bladed fire dampers is designed to stop the spread of flame through ducts, walls, floors and ceilings.

Construction

Standard dampers are manufactured of galvanised mild steel. Alternatively, blades can be manufactured in stainless steel.

Fusible Link

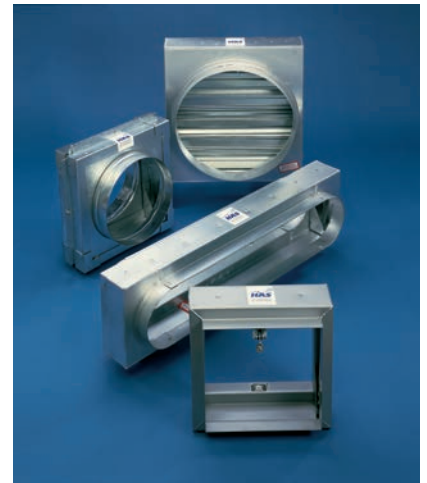

Blades are held in the open position by a straight bar link rated at 72 into a formed reinforcing swage and two location holes. Higher rated links can be supplied if required.

Installation Frames

HAS can offer a range of factory fitted frames to suit all installation requirements.

Features

- Suitable for low medium and high velocity.
- Galvanised or stainless steel blades and casings.
- Infinite sizing to customers exact requirements (see catalogue).
- Comprehensive control options.
- Suitable for rectangular, circular and flat oval ducting.
