

Product Range

HAS-VENT is the UK's leading independently owned provider of ventilation and air movement products to the construction industry, in particular the building services sector. Our Mission is to continually improve our products and services to meet our customer needs.

HAS-VENT has been established for over 40 years and we understand the needs and requirements of our customers and the industry we work in. With ten strategically located branches throughout the UK our business has been developed and tailored to meet the specific demands of the customer and we constantly strive to maintain and enhance our high standards of service, delivery and quality.

HAS-VENT can also provide a complete range of fans supplied by our manufacturing partners including:

If you would like more information or would like to discuss our range of fans in detail please contact our sales team.

Ducting

Circular

Full range of Spiral Tube and Fittings all manufactured to DW144.
Available in a range of materials.

Rectangular

A full range of rectangular ductwork all manufactured to DW144.

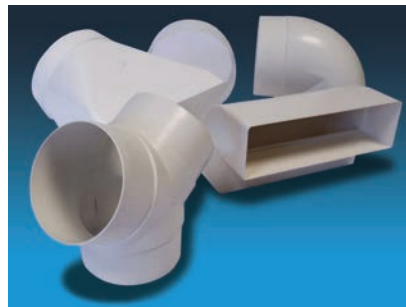

Flat Oval

Full range of Flat Oval ductwork all manufactured to DW144.

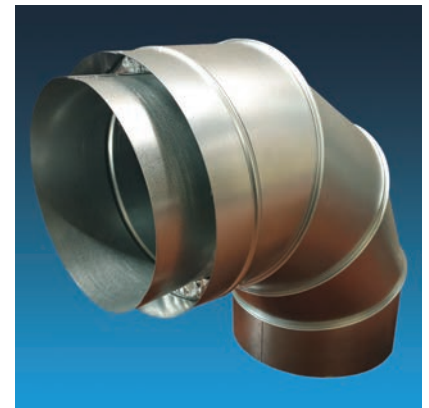

Gasket Sealed

A full range of H.A.S gasket sealed fittings all manufactured to DW144.

Plastic

A full range of plastic ductwork for all domestic and commercial applications.

Double Skin

A full range of H.A.S double skin ductwork all manufactured to DW144.

Colorduct

Colorduct is a highly visible, highly versatile, low cost system of coloured ducting that will enhance its environment. It is especially suitable for public places and enables ducting to become an essential design factor in air conditioning, ventilation and warm air heating applications.

Hasflex Flexible Ducting

Aluminium Flexible Ducting

HASFLEX MU is a range of fully flexible non-insulated aluminium/polyester laminated ducting, which has been specially designed for the HVAC market. Because of its flexibility it is easy to connect to either round or oval ducting.

PVC Flexible Ducting

The grey reinforced ducting is manufactured for the HVAC market and industrial purposes. It is suitable for all normal ventilation and air conditioning systems, including high pressure and successfully withstands constant bending or flexing.

Aluminium Insulated Ducting

HASFLEX MI is a range of fully flexible thermally insulated ducting. The range has been developed to minimise the heat gain or loss resulting from the temperature differential between the airflow and the surrounding ambient air.

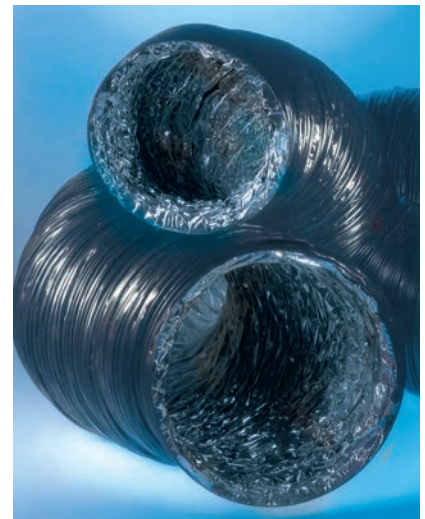

Acoustic Flexible Ducting

HASFLEX ML is fully flexible thermal and acoustic insulated ducting. It has been developed to reduce cross talk and noise generated by in-duct components and offers a high degree of sound absorption.

Semi-Rigid Aluminium Flexible Ducting

Corrugated flexible ducting in aluminium which can be easily formed to produce bends with a radius of less than 1/2 diameter.

Combi-flex Ducting

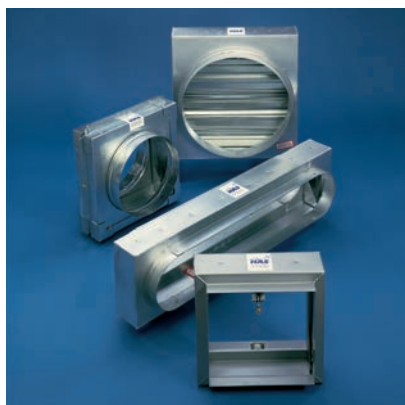

A new range of fully flexible reinforced, lightweight, aluminium polyester and PVC laminated duct. Suitable for low, medium and high-pressure heating, ventilating and air-conditioning supply or extract systems.

Dampers

Blast Gate Dampers

For use primarily within the extraction and materials handling industry. Their robust construction makes them an ideal means of controlling airflow within fume, dust and wood waste extraction systems.

Fire Dampers

This range of curtain bladed fire dampers is designed to stop the spread of flame through ducts, walls, floors and ceilings.

Volume Control Dampers

HAS-VENT can supply VCD's from a range of leading manufacturers, providing excellent choice and quality.

FSD-C Series

Circular externally resettable single blade combination damper, Fire, Smoke and Volume control.

Iris Duct Damper

The HAS-VENT Iris duct damper is an efficient and accurate airflow regulator for circular ducts which can also be used for ease and reliable measurements of airflow.

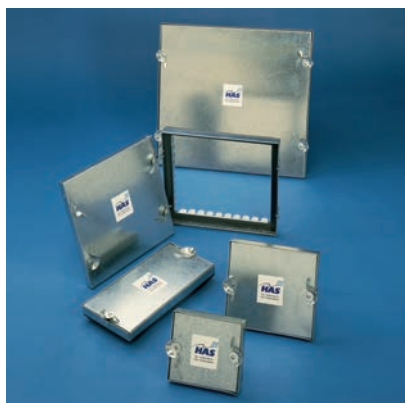

Access Doors

TDB Access Doors

A range of high quality pressed galvanised steel duct access doors manufactured in the UK.

Rectangular Access Door

Designed to provide access to all in-duct equipment for inspection, maintenance and duct cleaning.

Circular Door

Full range of access doors are available to suit all circular duct.

Accessories

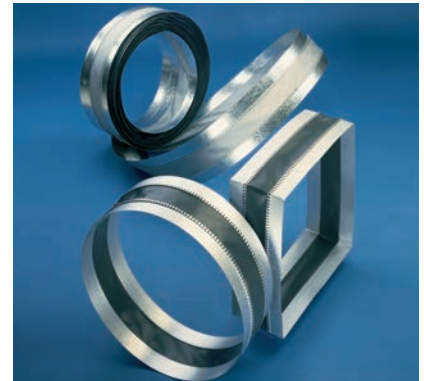

Turning Vane and Mounting Track

Manufactured from the highest quality corrosion resistant materials providing an economical and highly efficient form of air turn.

Supply and Exhaust Valves

A range of plastic and steel valves offering quality, performance and value.

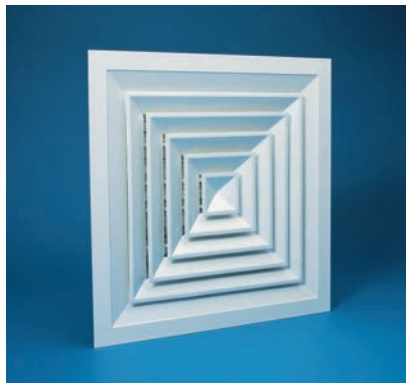

Flexible Duct Connector

Designed to prevent the transmission of vibration and noise between mechanical equipment and the ductwork system.

Rectangular Duct Jointing System

The slide-on flange facilitates rapid and accurate assembly of joints and has BSRIA Test Certification.

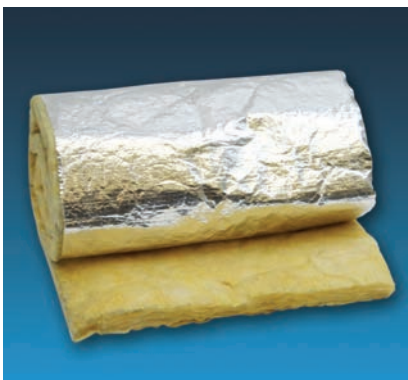

Four-Way Diffuser

A full range of grilles and diffusers are available from stock.

Sealants

A full range of sealants are available from stock.

HVAC Insulation Blanket

High Performance Duct Wrap is ideal for thermal and acoustic insulation of metal ducts.

Wire Hanging Systems

A full range of wire hanging systems are available from stock.

Clamping Products

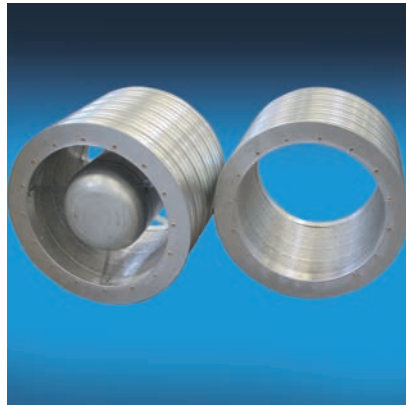

A full range of clamping products are available from stock.

Air Acoustics

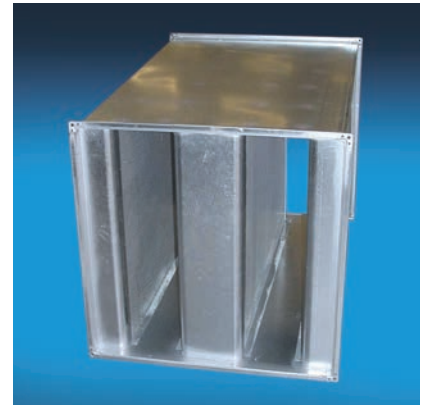

CA25 Circular Attenuators

Circular in line spigotted silencer available in 300, 600, 900 and 1200 lengths.

C3, C4 Circular Attenuators

Construction for this range comprises external pre-galvanised sheet steel tube over casing, manufactured in accordance with HVCA DW 144 specification, end rings fitted with tapped inserts to suit the relevant drilling detail.

RAF Rectangular Attenuators 7 Series

This new range of rectangular duct attenuators for HVCA applications offers an innovative acoustic splitter construction which provide significantly improved mechanical integrity of the acoustic media containment envelope.

Fans and Air Movement

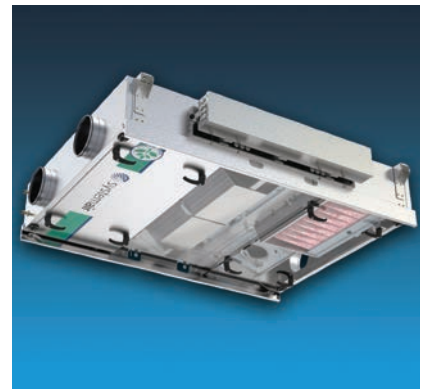

Circular Tube Fan

Full range of fans are available from high quality manufacturers.
